Computer Science graduate and Full Stack Developer with hands-on experience building scalable backend systems and modern web applications. Strong foundation in Python, JavaScript/React, Docker, relational and NoSQL databases, and API-driven architectures. Particularly interested in backend design, system reliability, and AI-powered applications. Known for strong problem-solving skills, clean code practices, and a continuous learning mindset. Eager to contribute to impactful engineering teams while further developing expertise in production-grade software systems.

Projects

- Developed a local-network shared folder system with secure file synchronization, dynamic GUI, and real-time updates. Technologies Used: Python (backend & secure TCP), Tkinter (GUI), SSL (encryption), Watchdog (file sync), Multithreading (concurrency)
- Developed Full-stack order processing application. Built with Python, React, JavaScript, Docker, RabbitMQ, Rest API and MongoDB.
- Developed MeetingMind – A backend-first AI system for extracting action items, decisions, and open questions from meeting transcripts using a local LLM. Designed to be ethical, explainable, and production oriented.
- Developed ExpenseFlow – A PostgreSQL-backed workflow system in n8n implementing secure token authentication, role-based access control, claim approval routing, and automated business logic with SQL-driven validation.
- Building a local-first, Dockerized AI prompt optimization Chrome extension powered by Ollama (gpt-oss) with FastAPI backend, universal site adapters, and diff-based rewrite UX (in active development).

Professional Experience

Rf Engineer

Beeper, Ramat Gan, Israel — *May 2019 - December 2022*

Troubleshot and maintained complex technical systems in the field. Worked cross-functionally to resolve issues and support system reliability.

C4I's Systems Operators Commander

IDF, Jerusalem, Israel — *February 2016 - May 2019*

Led C4I operations and managed critical military communication systems. Oversaw advanced tech platforms (Elbit DAP, Motorola, WiMAX) supporting field missions.

Online Marketing Manager

Optinize, Tel Aviv, Israel — *January 2015 - February 2016*

Built and customized marketing content using HTML and CSS. Collaborated with international clients to support tech-driven campaigns.

Education

B.Sc in Computer Science
October 2020 – December 2024
The Open University Of Israel
